## MEMORIAM

G L A S S

*Timeless and stylish, virtually maintenance free,  
Memoriam Glass Monuments  
and Memorials  
combined with stainless steel and granite,  
are the perfect alternative Memorial.*

## About Us

Memoriam Glass is a celebration of years of combined research, development and expertise that now sets a new dimension for today's Memorials.

Profile Glass, Memoriam Glass's parent company, has over 12 years of experience in the decorative, sculptural and industrial glass industry.

All of the artwork and production of the glass memorial is done in house or using local manufacturers. This gives greater control over the production and the high quality of finish expected by Memoriam Glass.

Our production techniques allow for easy installation, without requiring any specialist glazing knowledge.

Glass Memorials have been widely accepted in European cemeteries for decades and now this beautiful alternative is being introduced to Australia.

## Safety

Safety is paramount; our 40mm laminated glass headstones can withstand considerable force. In the unlikely event of breakage, it will hold together unlike plate glass.

Our memorial plaques are also laminated and/or toughened for safety as well as being fully framed for added security.

## Headstones

Memoriam Glass sets a new standard in elegant memorials—

The timeless beauty of glass...

- Durable 40mm thick glass
- Industrially coated virtually maintenance free
- Wide range of design options
- Combined with stainless steel and granite
- Glass is mounted into stainless uprights for easy installation
- Laminated for strength and safety

## **Inscription Method**

The standard method for inscription is sandblasting or etching. This involves removing a layer of the glass leaving a frosted finish. Other colourful methods include ceramic fire glazing, digital printing, and fusing.

## **Sandblasting**

The glass is masked with an abrasive resistant material and then blasted using special sand to remove the unprotected surfaces. This technique allows for the use of a large amount of text as well as 2-tone images. Sandblasting also allows for the addition of future inscriptions.

## Photo and Image Tiles

Photos of loved ones and images that represent their lives can be inserted onto the glass headstone. The image is digitally printed onto a plate of glass and then secured onto the headstone with a stainless steel border.

Simply supply us with the images or specify the type of images you would like to use and we can find and supply one for you. If you would like to supply a photo, please provide us with a high quality digital photo indicating the area that you would like to use. If you only have a printed photo, we can scan it in but the quality may not be as good as a digital image. Images can be supplied on CD, DVD or emailed to [peter@memoriamglass.com.au](mailto:peter@memoriamglass.com.au).

## Fired Glazed Lettering and Imagery

Ceramic fired lettering can be silk screened onto the headstone. This allows for the use of colour in the text and imagery whilst maintaining a high level of detail. There is a wide variety of colours available to choose from, starting from the traditional gold through to reds, purples, yellows and black.

Ceramic Print

---

## Fused Lettering & Images

Glass can be fused onto the surface of the headstone using a variety of colours. This is ideal for making the family name stand out.

Fused Lettering

---

## Textured Glass

By heating the glass to extreme temperatures, the glass becomes textured according to the moulding beneath the glass. This allows for a unique memorial with various textures, images and text able to be embossed into the glass.

Textured Glass

---

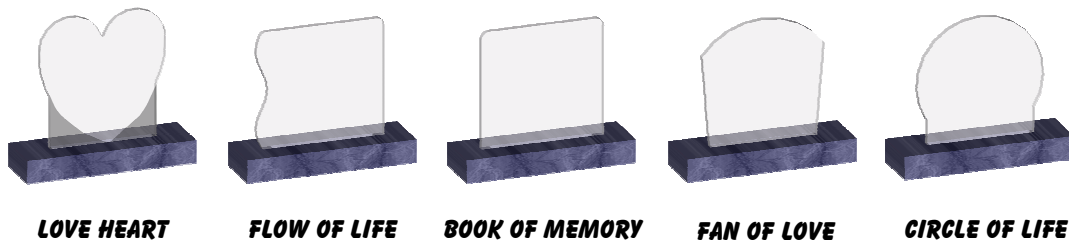

## Name Tablets

To allow for the addition of further details, we use name tablets mounted onto the front of the granite base. The unused locations can be covered using an art tablet or protective stainless steel covers.

Name Tablets

## Standard Shapes

## Standard Fonts

**ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz**  
Arial

**ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz**  
Eras Demi

## **How to design your headstone:**

### General Steps

1. Choose a shape from our standard range (or specify your own concept)
2. Decide whether name tablets are required
3. Choose a granite type
4. Decide on flower holder quantity

### Headstone Steps

5. Supply the text you would like to see on the headstone and select the method of inscription
  - Font Type
  - Sandblast
  - Ceramic print
  - Embossed
  - Textured
6. Select the images you would like to see on the headstone and the method of inscription
  - Sandblast
  - Ceramic print
  - Embossed
  - Digital print

### Name Tablet Steps

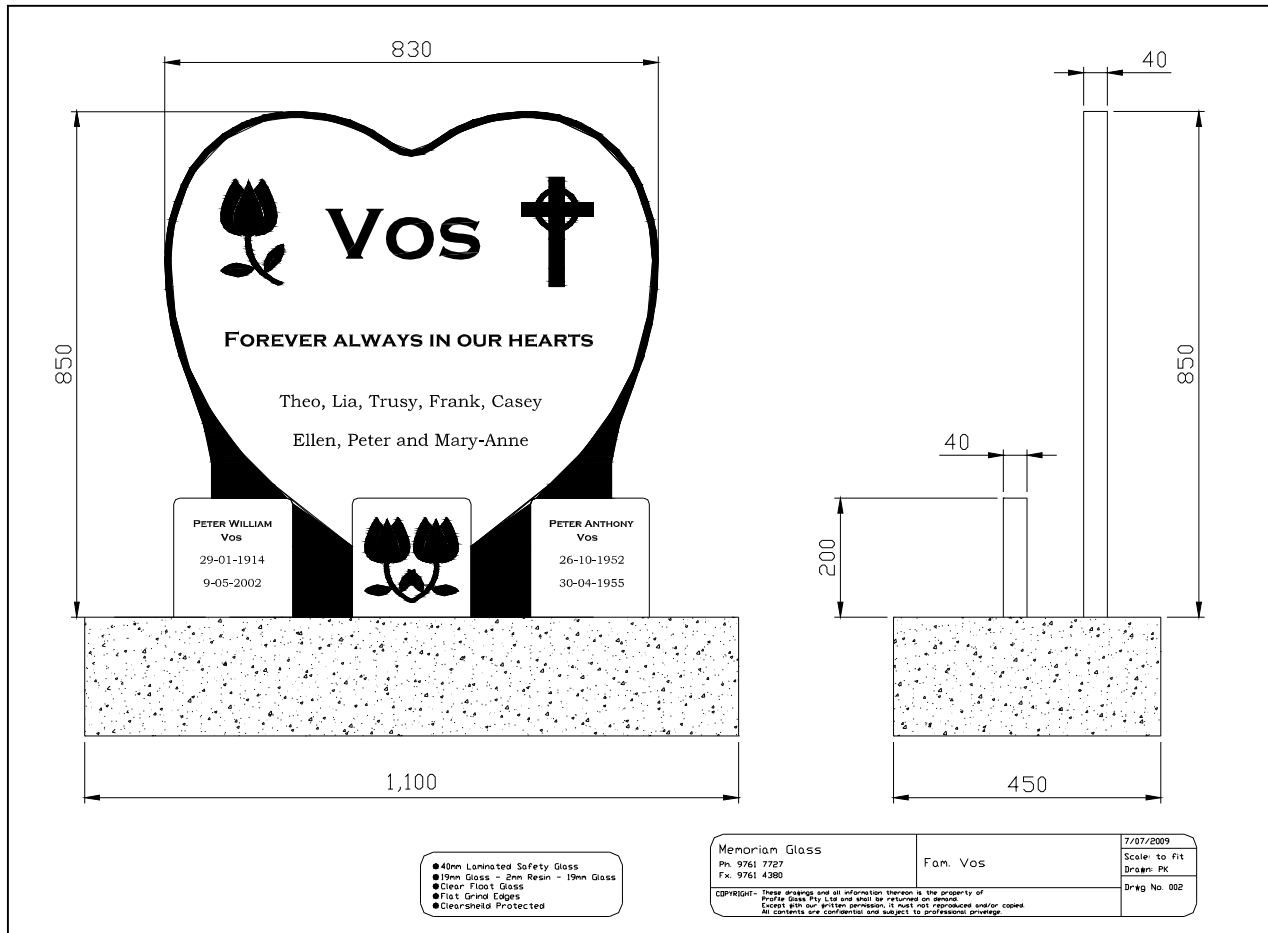

7. Supply the text you would like to see on the name tablet and select the method of inscription
  - Font Type
  - Sandblast
  - Ceramic print
  - Embossed
  - Digital Print
8. Choose the images you would like to see on the name tablet and the method of inscription
  - Sandblast
  - Ceramic print
  - Embossed
  - Digital print

### Please Remember

The strength of our business is to be able to assist in the creation of a personalised memorial. If the font style you would like is not one of our standards, or the image is not in our gallery, let us know of your concept and we can do the research and find suitable images for you.

## Concept Drawings

After receiving your requirements, we create concept drawings of your Personalised Memorial. The design can then be changed if you wish or we can go into production.
